

## Pharmacy Technology Degree PT23—65 Credit Hours

**Program Description:**

Pharmacy technicians directly affect a patient’s health in both community and hospital pharmacy practice, since it is their job to safely and effectively prepare medications for dispensing by the pharmacist. They gain great satisfaction in helping the patient through the prescription process and customer service. Pharmacy technicians need to have an eye for detail, good interpersonal and communication skills and a professional attitude. Some of the technical skills required are proficiency in dosage calculations, pharmacy law, pharmacology, medical insurance plans, computer skills and knowledge of Board of Pharmacy practice regulations. According to the Bureau of Labor and Statistics (BLS), employment of pharmacy technicians is expected to increase by 12% from 2016-2026. The BLS also suggests that pharmacy technicians with formal education or training, previous work experience, and national certification, will be specifically sought after to meet these demands. Starting salary \$37,790.
