

Workplace Safety Training

Lockout/Tagout

This course covers the role and responsibility of the employer to develop and implement an energy control program, or lock-out/tag-out (LOTO) for the protection of workers while performing servicing and maintenance activities on machinery and equipment. Upon course completion the student will have the ability to explain the importance of energy control programs, procedures, training, audits and methods of controlling hazardous energy.

Globally Harmonized System (GHS)

Workers are exposed to hazardous chemicals daily in the workplace. Such conditions pose a serious health threat to the worker. OSHA requires training regarding chemical hazards in the workplace. In this course you will learn about the HazCom (Hazardous Communication) Standard and the new Globally Harmonized System (GHS), and how to use Safety Data Sheets (SDSs) and chemical labels to protect yourself from hazards or react to chemical exposures.

Forklift Operator

This course is designed to demonstrate proper powered industrial truck/forklift operation while following OSHA regulations and standards. Students will gain the fundamental knowledge and skills necessary to operate a sit-down counterbalanced, LP gas powered forklift as well as safety, operations, basic maintenance, and OSHA compliances issues.

Forklift Instructor Certification

If your company has a need to train forklift operators on an ongoing basis, then certifying one or more employees as instructors may be your best solution. Our Forklift Instructor Certification course provides a three-year operator license as well as instructor certification. The first day consists of operator certification. The second day is devoted to techniques for one-on-one and classroom training. Each Student Will Receive: (1) Forklift Operators Card valid for 3 years from completion date, (2) Forklift Train The Trainer Card with no expiration date, (3) Instructors Manual with all forms, quizzes, etc... in 3-ring binder for easy duplication, (4) electronic copy of forms, (5) PowerPoint Presentation with further forklift training media, (6) Written copy of basic Forklift Safety Training Program (meets OSHA approval and all compliance guidelines) will be included in Trainer's Manual.

HeartSaver - CPR/First Aid/AED

Taught by American Heart Association certified instructors and designed to provide first responders with training in basic first aid and CPR AED procedures — including the first aid skills recommended by OSHA — in a format that can be delivered in a single day.

The Heartsaver® First Aid CPR AED course is intended for all individuals who have a duty to respond to a first aid or cardiac emergency because of job responsibilities or regulatory requirements.
