

ACBSP Business Programs Accreditation

The Accreditation Council for Business Schools and Programs (ACBSP) is a leading specialized accreditation association for business education. ACBSP accredits business, accounting, and business-related programs at the associate, baccalaureate, master, and doctorate degree levels worldwide. The accreditation focuses on recognizing teaching excellence, determining student learning outcomes, and a continuous improvement model.

ACBSP's student-centered teaching and learning approach ensures students gain the right skills from their educational investment. Institutions with programs accredited by ACBSP are committed to continuous improvement that ensures business programs deliver students the skills employers want.

West Georgia Technical College earned ACBSP Accreditation in Accounting, Business Technology, Business Management, and Marketing Management in 2011. Every two years a Quality Assurance report is submitted to ACBSP for review to maintain accreditation status. The report initiates preparatory steps for the reaffirmation of accreditation process which will be in 2020.

Tables two and seven below connect to Student Learning Results and Business Unit Performance Results, respectively, as measured and reported to ACBSP in the most recent Quality Assurance Reports. The table below provides data on enrollment, retention, and awards conferred for ACBSP accredited programs AY17, AY18, and AY19.

TABLE 2: Student Learning Results (Standard 4)

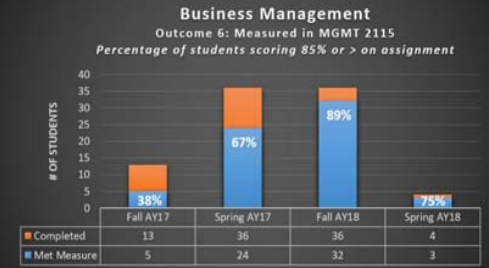

Use this table to supply data for Criterion 4.2.

Performance Indicator	Definition
1. Student Learning Results	<p>A student learning outcome is one that measures a specific competency attainment. <i>Examples of a direct assessment (evidence) of student learning attainment that might be used include: capstone performance, third-party examination, faculty-designed examination, professional performance, licensure examination).</i> Add these to the description of the measurement instrument in column two:</p> <p>Direct - Assessing student performance by examining samples of student work</p> <p>Indirect - Assessing indicators other than student work such as getting feedback from the student or other persons who may provide relevant information.</p> <p>Formative – An assessment conducted during the student’s education.</p> <p>Summative – An assessment conducted at the end of the student’s education.</p> <p>Internal – An assessment instrument that was developed within the business unit.</p> <p>External – An assessment instrument that was developed outside the business unit.</p> <p>Comparative – Compare results between classes, between online and on ground classes, Between professors, between programs, between campuses, or compare to external results such as results from the U.S. Department of Education Research and Statistics, or results from a vendor providing comparable data.</p>
	<p>- If for any given performance measure your goal is being exceeded repeatedly, consider either increasing the goal or changing the performance measure so that action can be taken to improve the program.</p>
	<p>- For all data reported, show sample size (n=75).</p>

TABLE 7: Business Unit Performance Results (Standard 6)

Complete the following table. Provide three or four examples, reporting what you consider to be the most important data. It is not necessary to provide results for every process.

Organizational Effectiveness Results	<p>Organizational effectiveness results examine attainment of organizational goals. Each business unit must have a systematic reporting mechanism for each business program that charts results such as enrollment patterns, student academic success, graduation rates, retention rates, job placement rates, transfer rates, industry certification/licensure attainment, increased use of web-based technologies, use of facilities by community organizations, contributions to the community, or partnerships, retention rates by program, and what you report to governing boards and administrative units.</p> <ul style="list-style-type: none">- Please note that data reported in this table should be business unit data and not institution-wide data.- If for any given performance measure your goal is being exceeded repeatedly, consider either increasing the goal or changing the performance measure so that action can be taken to improve the program.- For all data reported, show sample size (n=75).

Increase enrollment by 5% over previous year

Technical College System of Georgia Knowledge Management System (TCSG KMS) Report TEC0127 by College, by Program, by Academic Year

Overall, ACBSP-accredited programs experienced an average enrollment increase in AY16 (0.13%) and decreases in AY17 (-0.95%) and AY18 (-7.71%).

Current results

AY16-AY17:

ACCT = -5%
 BUSN = -13%
 MGMT = 11%
 MKTG = -39%

AY17-AY18:

ACCT = -27%
 BUSN = -12%
 MGMT = -3%
 MKTG = 9%

Upon evaluation of the enrollment increase/decrease for ACBSP-accredited programs, a need for additional marketing and recruiting not only by faculty but also by the institution should be a primary focus. In AY18, TCSG also recognized enrollment declines and began program reviews to evaluate curriculum standards in an effort to meet critical skills needed by industry.

Faculty participated in strategic planning to develop goals/themes: student success (increase access and articulation), resource management (acquire technology), community partnerships (collaborate with business, industry, and K12 and university systems), and communication (branding and marketing). Additionally, ACBSP programs will participate in recruitment activities, such as Open Houses, to increase program awareness and enrollment.

Increase graduation rate by 5% over previous year

Technical College System of Georgia Knowledge Management System (TCSG KMS) Report TEC0109 by College, by Program, by Academic Year

Overall, the ACBSP-accredited programs graduation rate decreased 2% in AY17 and 43% in AY18.

The decrease in ACBSP-program graduates is further evidenced by a decrease in enrollment and program retention.

Utilization of student DegreeWorks advisement summaries will help faculty evaluate and adjust course offerings by campus. Faculty will submit graduate documentation timely to ensure completions are included in the statewide data system. Further, faculty will collaborate with the Advising Center in an effort to more successfully guide a student's program progression from his or her first term to program completion.
