

Student Achievement Data

West Georgia Technical College identifies, evaluates, and publishes goals and outcomes for student achievement. WGTC utilizes the IPEDS 8-Year Completion Rate. The Benchmark for WGTC will be to exceed the averages of TCSG and of a subset of like-institutions (mission, size, population, and geographic location). WGTC also utilizes disaggregated data such as a comparison between Pell recipients versus Non-Pell recipients and full-time versus part-time students for analysis and improvement.
