

Why should you consider applying? Have you ever wondered about working for one of the busiest air terminals? Well, we have got the perfect opportunity for the students to try their luck.

We are hiring a Fire Systems Technician who would learn and grow working at the Atlanta Airlines Terminal Corp Facilities Services and would have a number of opportunities to excel in the same field.

We are more inclined towards meeting the fresh students who have completed their graduation in any technical field.

Job Title: Fire Systems Technician I

Shift: 10:00 PM to 06:00 AM

Location: Atlanta, GA 30320

Pay Rate: 19.33/hr to 24.13/hr (depending on the knowledge and skills)

How to Apply:

Update your resumes and send it over to arbaz.k@apideltech.com (Arbaz Khan, Account Manager) or call at 470-504-1562.

Essential Job Functions:

- Possesses working knowledge and understanding of fire alarm and suppression systems in commercial, institutional, aviation, manufacturing, or similar setting.
- Completes testing, inspection, servicing, preventative maintenance, and repair of all equipment associated with the Hartsfield-Jackson Atlanta International Airport's fire suppression systems (wet, dry, pre-action, and deluge).
- Works under direct supervision of the fire suppression superintendent and completes work consistent with NFPA, state of Georgia, city of Atlanta Fire Marshal, and client requirements.
- Conducts performance tests on facility wet, dry, pre-action and deluge systems and records work order information on work performed in the Hexagon Enterprise Asset Management System.
- Uses, cares for, and is responsible for tools and equipment used to complete the testing, inspections, servicing, preventative maintenance, and repairs to fire suppression systems.
- Supports the work of outside contractors on behalf of AATC to complete special projects as required by AATC to maintain the operations of the fire suppression systems.
- Follows safe work practices and safety policies consistent with site Health, Safety and Environmental programs and plans required to maintain the fire suppression systems.
- Manages self to comply with project code of conduct requirements, as well as other company policies and procedures required to meet safety and performance requirements.

Knowledge, Skills, and Abilities

- Working knowledge of wet, dry, pre-action, and deluge fire suppression systems, alarms and special hazard system installations, system preventative maintenance and testing.
- Ability to use hand tools, power tools and equipment applicable to the testing, servicing, inspections, preventative maintenance, and repair of fire suppression systems.
- Ability to cut, thread and hang sprinkler pipe; install new or replace various types of existing sprinkler heads; troubleshoot and complete repairs to air compressors, accelerators, and motors; respond to and report the location of fire alarms; perform preventative maintenance on the fire systems.
- Basic understanding and experience working with low-voltage systems and mechanical aptitude for working with fire system components (gauges, valves, modules, motors compressors, etc.).
- Ability to read and interpret drawings, specifications, vendor data and technical data sheets, etc.

- Ability to demonstrate general knowledge and work practices consistent with NFPA standards, state of Georgia Fire Code, city of Atlanta Fire Marshal, and OSHA safe work practices associated with fire suppression and safety systems.
- Ability to trouble-shoot, diagnose and repair wet, dry, pre-action, and deluge systems.
- Proficient in computer software and Computerized Maintenance Management System (CMMS) applications, such as Microsoft Office Suite, Hexagon Enterprise Asset Management System, Maintenance Connection, Maximo, etc.
- Familiar with general operations, safety practices and policies, as well as specific knowledge of procedures and standards applicable to the safe practice of the testing, inspection, servicing, preventative maintenance, and repair of fire suppression systems.
- Ability to work cooperatively as part of a team of fire suppression technicians in the delivery services to the Atlanta Airlines Terminal Company, LLC.

Education

- High School degree or GED with an Associate's degree preferred.
- Little to no experience is needed.
